

Training

Åkerströms has more than 50 years' experience in educating, maintaining and repairing equipment for demanding environments. We know that it's important to give the service and education each customer needs. Training needs are different depending on the participants' knowledge and business-specific systems. We therefore offer a variety of courses, and each customer can choose which type works best along with their requests and needs.

Our training is very comprehensive. The courses are carried out normally with us in Björbo, but can also be located at the customer. We offer:

- Service courses on all systems
- User's courses on all radio systems
- Seminars on standards and safety regulations
- Tailor-made courses according to the customer's wishes

Basic and advanced courses.

- Installation and trouble shooting (1-2 days)
1-2 days' courses regarding review of

following systems; Remotus 7000, Remotus Jupiter and Remotus Mercury focusing on the customer's own business.

Locomote and Sesam.

Courses on Locomote and older systems and also on Sesam 2000, Sesam 500, Sesam 800 and Sesam 6000 can also be arranged.

Tailored to participants' skills.

The courses aim is to provide participants with knowledge of installation and troubleshooting via PC. This course is for the user and tailored to participants' skills and company-specific systems.
